April 1, 2022

Dear Parent/Guardians,

The Departments of Education and Health in Pennsylvania have further relaxed the reporting requirements of COVID-19. Today, superintendents received an email announcing that school must only report a positive case if it occurs during the week in a school building. This reporting done via a web survey that is available to school districts and their pandemic coordinators.

As of today, there have been zero reported cases of COVID-19 in our schools. Should a case occur, notification will be made by the school building administrator in which it has occurred.

I hope you find this as an optimistic sign that we are coming closer to ending the uncertainty brought about by the pandemic. For many other reasons, we are entering an exciting time of the school year which is also cause for optimism and celebration.

Thank you for your continued support. And dedication to the children of Belle Vernon Area School District.

Sincerely,

Dr. Ken Williams
Superintendent of Schools
